KATALOGU ALFABETIK I LIBRIT NË GJUHË TË HUAJA

2000 - 2003

ALPHABETIC CATALOGUE OF BOOKS ON FOREIGN LANGUAGES

PRISHTINË
2004

Udhëzim për lexues

Katalogu alfabetik i librit shqip 2000 - 2003

Katalogët e Bibliotekës janë burime themelore të informatave bibliotekare, përmes të cilëve bëhet prezantimi i të gjitha koleksioneve të bibliotekës. Katalogët janë ndërmjetsues në mes të koleksioneve dhe shrytëzuesve të bibliotekës.

Katalogu Alfabetik është katalog themelor dhe kryesor i bibliotekës, njëherit është edhe katalog pa të cilin as që mund të mendohet një bibliotekë. Detyra themelore e këtij katalogu është të prezantojë koleksionet e gjithëmbarshme të bibliotekës. Njësitë katalogjike në këtë katalog janë të radhitura në bazë të alfabetit të autorit (indvidual apo kolektiv), përkatësisht titullit të veprës (te veprat anonime, monografitë, jubiletë etj.). Nga kjo mënyrë e radhitjes së njësive skedarike e ka marrë emrin.

Katalogu Alfabetik i librit shqip dhe librit të huaj (2000-2003) është punuar sipas normave dhe standardeve ndërkombëtare bibliotekare, si në përcaktues dhe në përshkrimin katalogjik-bibliografik të miratuara nga IFLA dhe organet e saja.

Të gjitha njësitë katalogjike e kanë indeksin-numrin e KUD-it, me këtë rast janë aplikuar risitë - ndërrimet e fundit në KUD që janë bërë në grupin 8 përkatësisht nëngrupet 81-Gjuhësia dhe 82 - Letërsia.

Njësitë skedarike përmbajnë edhe numrin e signaturës në bazë të cilit të gjithë librat janë të vendosur - rradhitur në raftet e deposë, ky sistem është i njohur me emrin Numerus Currens sipas formatit, librat janë të ndarë në pesë grupe. Ky sistem i rradhitjes aplikohet në bibliotekat e mëdha me koleksione të pasura.

Të gjitha të dhënat e njësive katalogjike i kemi bartur në kompjuter dhe e kemi formuar datotekën përkatësht katalogun elektronik. Këto të dhëna i kemi shtypur-printuar në skeda dhe i kemi formuar këta skedarë : Skedari alfabetik (publik dhe intern), Skedari sistematik dhe Skedari topografik.

Njëkohësisht të dhënat e njëjta i kemi shtypur-printuar në letër dhe e kemi formuar Katalogun libër, të cilin e kemi ndarë në dy pjesë:

- Katalogu i librit shqip
- Katalogu i librit të huaj

Katalogët përfshijnë të gjithë librat që kanë hyrë pas luftës në Bibliotekë (si dhuratë, blerje, kopja e detyruar dhe këmbim), si dhe librat e viteve 1990 -1999, përkatësisht nga periudha e okupimit. Katalogu ka përdorim të gjërë në Bibliotekë : në Shërbimin e katalogimit, klasifikimit, të informatave, pasurimit, bibliografisë etj. Katalogu është me interes edhe për rrjetën e Bibliotekave në Kosovë dhe më gjërë. Katalogu në të dy gjuhët përmban reth 10.000 njësi katalogjike ose rreth 40.000 libra të cilat janë të gatshëm për shfrytëzim.

Duke u nisur nga të dhënat dhe përmbajtja e katalogëve mendoj se botimi është më se i nevojshëm, sepse këta katalogë-libra do të shërbejnë edhe bibliotekave tjera në Kosovë dhe do të jenë material i mirë për këmbim me bibliotekat në botë.

Muharrem Halili

Instructions for the users

Alphabetic catalog of the foreign book 2000 - 2003

Library catalogs are primary sources of information in a library, through which all library collections are represented. Catalogs are mediators betwwen collections and library users.

Alphabetic catalog is a basic and primary catalog of any library, at the same time it is a catalog without which no library can be imagined. The main task of this catalog is the representation of all library collections. Cataloging items in this catalog are filed in alphabetic order according to the name of the author (individual or collective), respectiveelly according o the title of the work (if the work, monograph, jubilee, etc., is anonymous). Therefore its name is derived according to the filing order of catalog cards.

Alphabetic catalog of the Albanian book and the foreign book (2000 - 2003) is created according to international library standards and norms, by providing access points and a standard bibliographic description approved by IFLA.

All catalog cards are provided with an index - UDC number. In this case, revisions that happened to UDC have been applied to the indexin system - latest revisions of UDC which affected group 8, respectively subgroups 81- Linguistics and 82 - Literature.

Cataloging cards contain a signautre numver according to which all library items are filed in library depots, this system is known by the name Numerus Currens, that is items are filed according to the format (size) of the item. Books are devided into five groups. Libraries with a huge amount of collections apply this filing system.

All records of catalog cards have been entered to the computer, thus we have created a database, that is the electronic catalog. These records have been printed in the cards to enable the creation of card catalogs. Therefore we have: Alphabetic card catalog (public and internal), Systematic card catalog and Topological card catalog.

Simultanously, the same records have been printed in paper and we have created a Book Catalog, devided into two parts:

- The catalog of books in Albanian
- The catalog of books in foreign languages

These catalogs include all books that the library has received since the end of the war (as a donation, purchase, legal deposit or through exchange), as well as books between the period 1990 - 1999, respectively, during the occupation period. These library catalogs have a wide use within the library: in the Cataloging and Classification Department, Information Services, Acquisition Department, Bibliographic Department, etc. Library catalogs are in the interest of library network in Kosova and beyond. The Book Catalogs, in both languages, include about 10.000 records or about 40.000 books, which are available for use to the users.

Based on the records and the content of these catalogs, I think that their publication is necessary, because these catalogs will serve other libraries in Kosova as well, and they will be a good source for exchanging purposes with other libraries in the world.

Muharrem Halili
